

FLORILEGIUM

Catalog 2025

Florilegium

Is a conservation initiative that integrates art, education and tourism in the Andean páramo. Through artistic botanical documentation and commitment to sustainability, the project developed at Chilcabamba Mountain Lodge, invites travelers to experience the beauty of the Cotopaxi while fostering a deeper appreciation for the environment.

Our history

Florilegium was born from the artistic botanical illustration of ten species of native páramo plants found in our garden. These scientific illustrations have been carefully developed, and each one "sponsors" one of our rooms at Chilcabamba Mountain Lodge, which now adopt new names and thematic décor inspired by the plant they represent. In this way, the rooms are transformed into unique spaces that celebrate biodiversity and tell a story of conservation.

Our purpose

We invite our customers to take home a piece of this meaningful artistic experience - while becoming active contributors to the protection of the Andean páramo. 1% of each purchase of our thoughtfully designed products supports the conservation of native flora and helps sustain the ecological balance of this majestic and unique landscape.
